

DO YOU WANT TO KNOW WHAT  
ARE THE WAYS TO MAKE  
AUTOMATION TESTING BETTER?

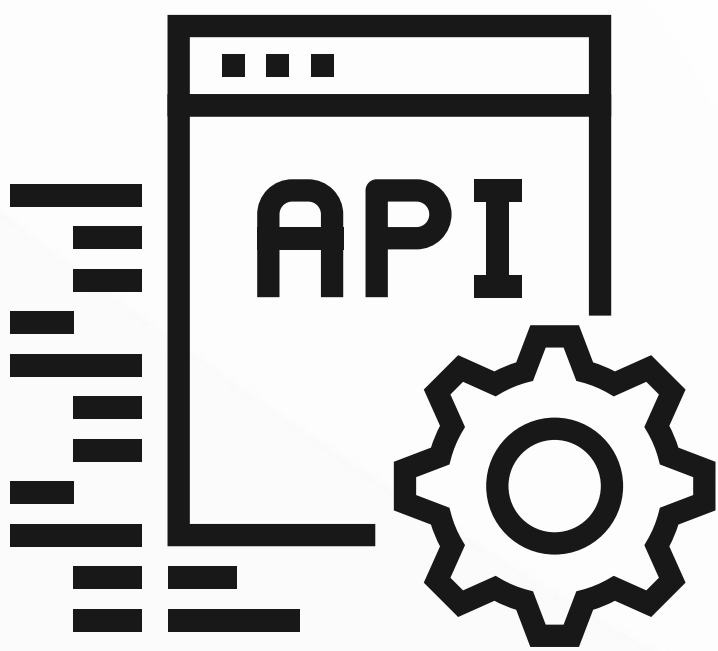

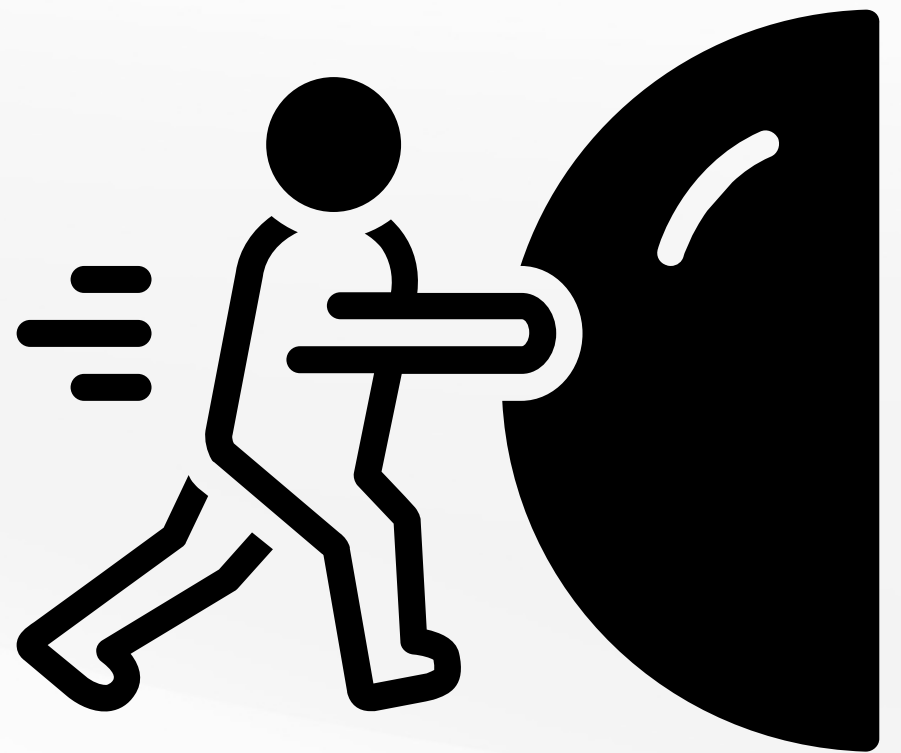

YES, SURE.

Prioritize your test automation strategy, make a checklist and decide what test cases to automate.

Divide your automation testing efforts.

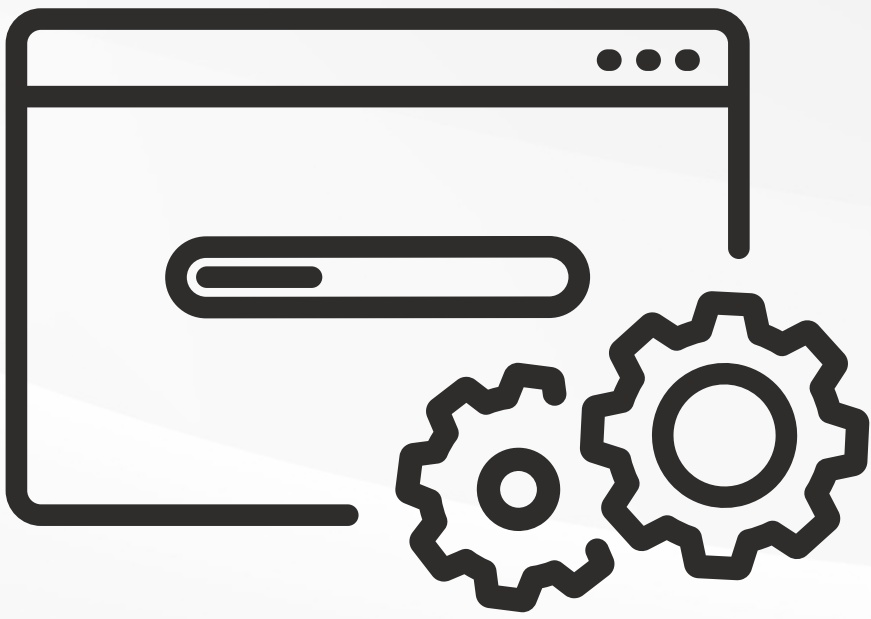

Start with API Automation Testing.

The implementation of automation testing can be integrated with the software development process to execute in parallel.

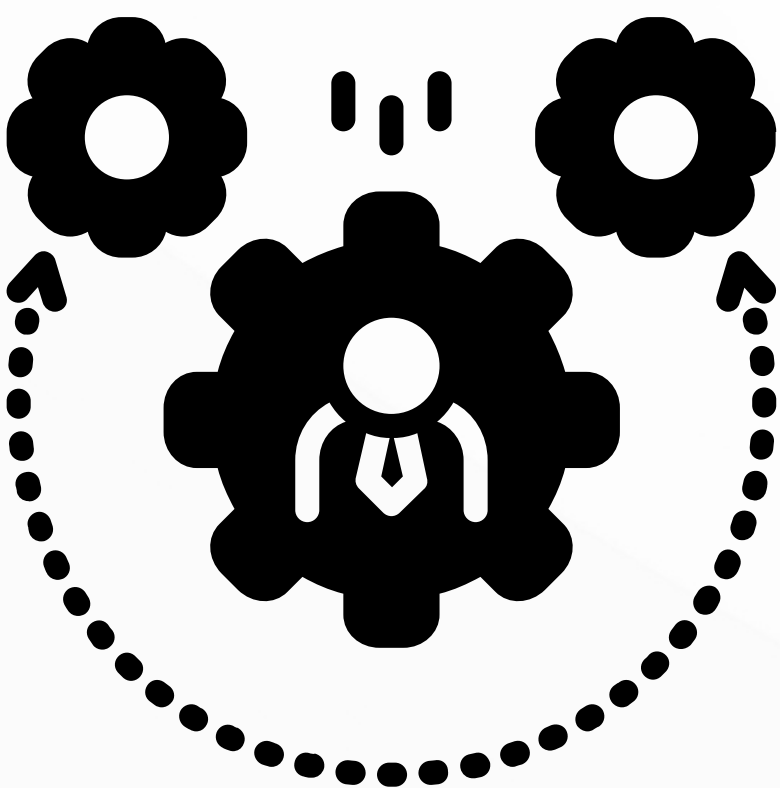

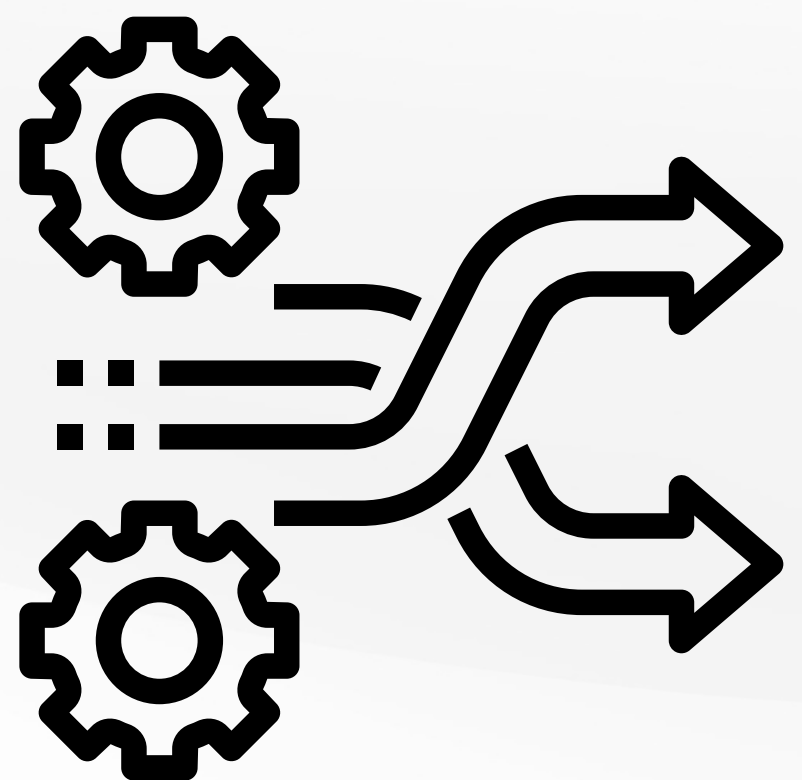

The test automation tool you choose should align with your technology stack.

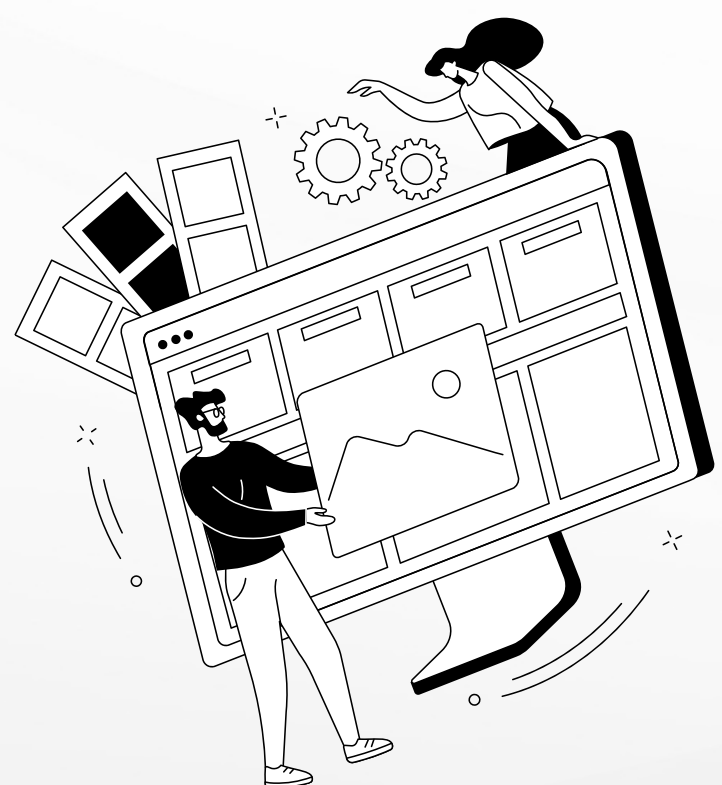

For ex: We recommend Cypress for react based application testing

Create automation tests that are resistant to change in the UI

Think about the dynamic part that should be automated.

Maintain stability and consistency to automate the most critical part of business application.

IF YOU WANT TO SUCCEED IN TEST AUTOMATION, IT'S IMPORTANT TO STAY UP-TO-DATE WITH THE LATEST PRACTICES AND METHODS. WE CAN'T JUST AUTOMATE EVERYTHING BECAUSE IT'S AUTOMATION, NOT AUTOMAGIC.

I AGREE.
